PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience designing, building and shipping responsive web applications end to end: React.js, Vue.js and TypeScript on the front end; Node.js, FastAPI, Django and Flask services backed by PostgreSQL on the back end. Experienced in RESTful API design and integration, JWT authentication and role-based access control, containerised delivery with Docker and Git-based CI/CD, and SEO-focused, accessible interfaces. Passionate about building joyful, secure products that are performant, scalable and accessible across every channel.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, PHP, HTML5, CSS3

Front-End: React.js, Vue.js (Vue 3), Nuxt.js, Vite, Redux Toolkit, Pinia, jQuery

Back-End & APIs: Node.js, FastAPI, Django, Flask, RESTful API design and integration, JWT authentication, role-based access control, AJAX, asynchronous request handling

Databases: PostgreSQL, MySQL, SQLite, Redis

DevOps & Testing: Git, GitHub Actions (CI/CD), Docker, Docker Compose, AWS, DigitalOcean, Netlify, Jest, Mocha, PyTest, Postman

Styling & UI: SASS, LESS, Tailwind CSS, Bootstrap, Vuetify, responsive and adaptive design, mobile-first and PWA, cross-browser compatibility

Analytics & SEO: GA4, Google Tag Manager, Google Search Console, Google Site Kit, Firebase, JSON-LD schema, Core Web Vitals

CMS & Methods: WordPress (Avada), Agile/Scrum, peer code reviews, application security

KEY PROJECT

AlphaOne | Multi-Tenant Rental Management SaaS | Live: alphaone.africa

- Full-stack SaaS platform for property managers, developed collaboratively in a shared Git repository with peer code reviews across the stack: a React/Vite front end paired with a FastAPI and PostgreSQL back end, containerised with Docker Compose.
- Implemented JWT authentication, protected routes and role-based access control, with security hardening including rate limiting, PII encryption and HMAC-SHA256 blind indexes.
- Integrated the WhatsApp Cloud API for tenant notifications, payment reconciliation and automated messaging workflows.
- Designed responsive dashboards for organizations, properties, units, tenants, leases, billing, payments and finance analytics.

Tech: React, Vite, FastAPI, PostgreSQL, Docker, Redis, WhatsApp Cloud API, JWT

PROFESSIONAL EXPERIENCE

Digital Experience Specialist | OnQ Global

Feb 2026 – Present

Global business services and outsourcing: contact centre, healthcare RCM, labour outsourcing and AI automation, with hubs in Panama, Kenya and India

- Own onq.global, the company's WordPress (Avada) website, building and maintaining service and product pages (including Qnity AI Voice Agent and QlearView Analytics) with a consistent structure, responsive layouts and custom HTML, CSS and JavaScript.
- Lead the website revamp, from site audit and wireframe mockups through stakeholder presentations to phased implementation.
- Run technical SEO: Google Search Console sitemap submission and indexing audits, resolving redirect, canonical and duplicate-sitemap conflicts, and implementing Organization schema in JSON-LD.

- Set up and maintain analytics through Google Tag Manager, Google Analytics 4 and Google Site Kit; execute on-page SEO including metadata, internal linking, keyword tracking and Google Business Profile optimisation.
- Resolve platform issues with hosting, security and plugin vendors, including Cloudflare rate limiting, image delivery failures and admin access blocks.

Full-Stack Developer | Webloom Tech Kenya

June 2025 – Present

- Design, build and deploy full-stack web applications for e-commerce, creative services and personal branding clients, from SEO-optimized, mobile-first React.js, Vue.js and Nuxt.js front ends to Node.js, FastAPI and Django back ends.
- Design RESTful APIs and PostgreSQL data models covering authentication, input validation and business logic, and integrate them with client interfaces and third-party services.
- Containerise applications with Docker and ship through Git-based CI/CD pipelines to cloud hosting, managing environment configuration, deployments and ongoing maintenance.
- Collaborate closely with UI/UX design partners, prototyping and testing design feasibility while acting as user advocate to keep decisions grounded in real user needs.
- Serve as an internal reference point for engineering best practices across the stack through peer code reviews, technical guidance and change control procedures.
- Lead client onboarding, post-launch support and development lifecycle documentation, delivering projects from conception to completion.

Freelance Full-Stack Developer | Independent (Remote)

Jan 2023 – Present

- Design, develop and deploy full-stack web applications using React.js and Vue.js front ends with Flask, FastAPI and Django back ends within agile workflows, producing reusable components and creative solutions.
- Build and integrate RESTful APIs to display data, validate user input and post updates across web surfaces.
- Optimize applications for size, speed, performance and scalability while applying security controls across all delivery channels.
- Deliver through Git-based CI/CD pipelines on AWS, DigitalOcean and Netlify, with cross-browser testing and ongoing maintenance for client applications.

EDUCATION

Moringa School | Software Development

June – November 2024

Strathmore University | BSc. Business Information Technology

2015 – 2020

Relevant coursework: Web Development, Object-Oriented Programming (Java/Python), Database Management Systems (SQL, MySQL, PostgreSQL), IT Systems Administration, Networking, DevOps (Agile and SDLC), Introduction to AI and Machine Learning.

CERTIFICATIONS

- LinkedIn Learning: Leading Yourself, Communication Foundations, Business Presentations (2024)
- CISCO Networking (Section One), Kenyatta University (2015)
