PROFESSIONAL SUMMARY

Front-End Engineer with 3+ years of experience building responsive, cross-browser compatible web and mobile-web applications using JavaScript, TypeScript, React.js, and Vue.js. Strong command of RESTful API integration, state management, and SEO-focused single-page applications, with proficiency in agile practices, Git-based CI/CD, and application security controls. Passionate about creating joyful, user-centered digital experiences that are performant, scalable, and accessible across all channels.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, PHP, SQL

Front-End: React.js, Vue.js (Vue 3), Nuxt.js, jQuery, Vite, Redux Toolkit, Pinia

Styling & UI: SASS, LESS, Bootstrap, Tailwind CSS, Vuetify, responsive & adaptive design, cross-browser compatibility

Back-End & APIs: Node.js, Flask, FastAPI, Django, RESTful APIs, AJAX, asynchronous request handling

DevOps & Testing: Git, GitHub Actions (CI/CD), Docker, AWS, DigitalOcean, Netlify, Jest, Mocha, PyTest, Postman

Analytics & SEO: GA4, Google Tag Manager, Google Search Console, Google Site Kit, Firebase, JSON-LD schema, Core Web Vitals

CMS, Databases & Methods: WordPress (Avada), PostgreSQL, MySQL, SQLite, Agile/Scrum, mobile-first & PWA, peer code reviews, application security

PROFESSIONAL EXPERIENCE

Digital Experience Specialist | OnQ Global Feb 2026 - Present

- Develop and improve user-facing features across OnQ Global corporate websites using HTML, CSS, JavaScript, and React, contributing new pages, layouts, and continuous refinements aligned with marketing objectives.
- Implement UI/UX and search analytics through Google Analytics 4, Google Tag Manager, Google Site Kit, and Google Search Console, generating insights that inform ongoing site improvements.
- Execute on-page SEO including metadata, internal linking, schema markup, and keyword tracking to strengthen discoverability and performance.
- Liaise with software vendors and third-party partners to document, escalate, and resolve platform and integration issues efficiently.
- Follow change control procedures in Git-based deployments, seeing website initiatives from conception through release.

- Champion user-centered design by applying UI development best practices, incorporating user feedback, and continuously optimizing user experience and application performance.

Front-End Developer | Webloom Tech Kenya *June 2025 - Present*

webloom-tech.onrender.com

- Design and deliver SEO-optimized front-end applications for e-commerce, creative services, and personal branding clients, creating responsive and user-focused digital experiences.
- Architect responsive, cross-browser compatible React.js, Vue.js, and Nuxt.js applications with mobile-first design; consume RESTful APIs to display data, validate input, and post updates across client interfaces.
- Use Agile practices and modern technologies to rapidly develop efficient, innovative, and reusable solutions that enhance the organization's technology stack.
- Collaborate closely with UI/UX design partners, prototyping and testing design feasibility while acting as user advocate to keep decisions grounded in real user needs.
- Serve as an internal reference point for front-end best practices, researching approaches to more joyful, optimized user experiences and maintaining brand consistency across releases.
- Work collaboratively with front-end engineers through peer code reviews and technical guidance while adhering to change control procedures and delivering projects from conception to completion.
- Lead client onboarding, post-launch support, and development lifecycle documentation.

Freelance Front-End & Full-Stack Developer | Independent *Jan 2023 - Present (Remote)*

- Design, develop, and deploy responsive web applications using React.js, Vue.js, Flask, FastAPI, and Django within agile workflows, producing re-usable components and creative solutions.
- Consume back-end RESTful APIs to display data, validate user input, and post updates across web surfaces.
- Optimize applications for size, speed, performance, and scalability while applying security controls across all delivery channels.
- Deliver through Git-based CI/CD pipelines on AWS, DigitalOcean, and Netlify, with cross-browser testing and ongoing maintenance for client applications.

KEY PROJECT

AlphaOne - Multi-Tenant Rental Management SaaS (*Live: alphaone.africa*)

- Full-stack SaaS platform for property managers, developed collaboratively via a shared Git repository with peer code reviews across the stack; React/Vite front-end paired with a FastAPI + PostgreSQL back-end, containerized via Docker Compose.
- Designed responsive dashboards for organizations, properties, units, tenants, leases, billing, payments, and finance analytics.
- Implemented JWT authentication, ProtectedRoute components, role-based access control, and security hardening (rate limiting, PII encryption, HMAC-SHA256 blind indexes).

- Integrated WhatsApp Cloud API for tenant notifications, payment reconciliation, and automated messaging workflows.

Tech: React, Vite, FastAPI, PostgreSQL, Docker, Redis, WhatsApp Cloud API, JWT

EDUCATION

Moringa School - Software Development *June - November 2024*

Strathmore University - BSc. Business Information Technology *2015 - 2020*

Relevant Coursework: Web Development, Object-Oriented Programming (Java/Python), Database Management Systems (SQL, MySQL, PostgreSQL), IT Systems Administration, Networking, DevOps (Agile & SDLC), Introduction to AI & Machine Learning.

CERTIFICATIONS

- **LinkedIn Learning:** Leading Yourself, Communication Foundations, Business Presentations (2024)
- **CISCO Networking (Section One)** - Kenyatta University (2015)
